2014 DODGE 2500/3500 4WD

2.5" COIL SPACER SYSTEM

OVERVIEW

The 2.5" Lift system for 2014 2500/3500 Rams, with factory Radius Arm front suspension, features more than just basic spacers.

Dodge designed the front coil springs with a large bow to increase vehicle stability and handling. Unlike other flat spacers on the market, Fabtech's angled spacers retain this important feature preserving the factory ride characteristics.

The front shocks are replaced with longer length units to allow for full suspension travel while improving the damping of the front suspension. Extended length bump stops are included in this kit to prevent the coil springs from binding at full compression while also eliminating Trac Bar interference. Optional rear shocks are available separately.

FEATURES AND BENEFITS

- Angled Coil Spacers retain proper factory coil bow for handling.
- Replacement shocks allow for full travel with increased damping.
- Extended length bump stops eliminate coil bind and trac bar interference.
- Optional rear shocks available.
- Can be returned to stock.

INSTALLATION & TECH

- Estimated installation time - 1.5 hrs
- Amount of holes to drill for installation- 0
- Welding Required- NO

TIRE AND WHEEL SIZE

| | |
|------------------|---|
| Tire - 315/70R17 | Wheel - 17x9 w/4 5/8" BS w/minor trimming |
| Tire - 325/65R18 | Wheel - 18x9 w/4 5/8" BS w/minor trimming |
| Tire - 325/60R20 | Wheel - 20x9.5 w/5" BS w/minor trimming |
| Tire - 285/55R22 | Wheel - 22x11 w/5" BS w/minor trimming |
