2014 GM C/K1500 2WD/4WD 6" GEN II SYSTEMS

OVERVIEW

Fabtech has designed an all new Generation II 6" Suspension System for 2014 GM 1500 Silverado's that provides faster installation time and greater overall suspension performance than before with a lower price.

This new Gen II system retains the factory track width keeping the tires under the fenders for a clean appearance. With the factory track width retained the front Sway Bar utilizes the stock end links and mounting holes keeping the leverage on the bar proper. There are no CV spacers, impact struts or add a leafs required for installation. The front differential is relocated in a manner so that when driving at higher 4 wheel drive speeds vibration is reduced.

The GEN II Basic System utilizes a simplistic upper Coilover spacer that provides lift from the top of the shock rather than bottom up with reduced install time. Rear shocks are Performance Twin Tubes.

For aggressive offroad driving the GEN II Performance System comes with either Dirt Logic 2.5 Coilovers featuring Eibach coil springs or massive Dirt Logic 4.0 Coilovers. Rear Dirt Logic 2.25's complete this highly tuned system.

All bracketry and the skid plate is constructed of 1/4" thick steel for maximum strength and proven reliability.

The system passes FMVSS 126 standards for stability control functionality as tested by an independent lab.

All systems come with a Free 5 year 60,000 mile Powertrain Warranty.

FEATURES & BENEFITS

- Fast installation with heavy duty 1/4" thick steel construction throughout
- Retains factory track width keeping tires under fenders
- Sway Bar leverage is proper to OE specs
- Simplistic Coilover spacer system
- No CV spacers to install
- Front differential driveline angled for high speed 4WD operation
- Zero bump steer throughout travel range for optimum drive ability
- Available with Performance Twin Tube shocks or Dirt Logic 2.50 and 4.0 Coilovers and 2.25 rear shock
- Passes FMVSS 126 Stability Control Standards
- Free 5 Year 60,000 Mile Powertrain Warranty

INSTALLATION & TECH

- Estimated installation time - 2-3 hrs.
- Amount of holes to drill for installation – 0
- Welding required – No
- Cutting required – Yes
- Driveshaft modification required – No

TIRES & WHEELS

Tires 35/1250R17 Wheels 17x8 w/ 5" BS w/ minor trimming
Tires 325/65R18 Wheels 18x9 w/ 5" BS w/ minor trimming
Tires 35/1250R20 Wheels 20x9 w/ 5" BS w/ minor trimming

2014 GM C/K1500 W/ FACTORY STEEL SUSPENSION

6" Basic System GEN II w/Performance Shocks #K1083

				Total Jobber -		

FOOTNOTES - APPLY TO ALL KITS

1. Will not fit models with Factory AutoRide shocks.
8. Will not fit all wheel drive models.
14. Cannot use OEM wheel and tire.
17. Does not fit standard cab.
